1 I have had it for about a month.

2 I bought it at 'New World'.

3 No because it's a bit expensive.

4 Yes, I often go there.

5 I think it's nice.

Na spletu poišči Yellowstone, oglej si slike in poišči naslednje odgovore:

- What is Yellowstone? **It's a national park. / It's the first national park in the US.**
- What is the area of it? **Its area is 8,983 square kilometres.**
- Where is it located (name the states - 3)? **It is located in western US in states Wyoming, Montana and Idaho.**
- What can the visitors see there? **They can see geysers, hot springs, interesting wildlife, rivers, byways...**

--

Yellowstone Park is one of the most **fascinating** places in the USA. There are thousands of hot **springs** and **geysers**. It is visited by millions of **tourists** every year. Only recently have they begun to understand what they are looking at. Yellowstone Park is **actually** the largest active **volcano** in the world. It covers the **area** of almost 4,000 square kilometres. The last big **eruption** caused the **ash** from the volcano to cover most parts of the North America and the change of **climate**. During the **volcanic**

winter, clouds of dark ash hid the sun. It was so cold that many **species** of animals and plants disappeared from the Earth. The volcano is still alive today. Tests have shown that thousands of **earthquakes** happen every year. They remain **unnoticed** since they are very weak. However recently the number of earthquakes has **increased** and in some parts the **level** of the ground has risen. In the last 2.1 million years there have been three **super** eruptions. Most experts believe there is no **immediate** danger of another giant **explosion**, but it's impossible to be sure.

WORDS

- 1 eruption **c**
- 2 geyser **e**
- 3 earthquake **a**
- 4 level **f**
- 5 sensitive **b**
- 6 immediate **d**

DEFINITIONS

- a) sudden, strong shaking earth's surface
- b) able to measure very small changes
- c) explosion of a volcano
- d) nearest in time
- e) a place where hot water or steam is sent up naturally into the air from under the ground
- f) the height, position, standard, of ground

4) Workbook page 46/ ex. 1 / DZ str. 46 / naloga 1.

A earthquake, eruption

- B 1 fish ash
- 2 dead alive
- 3 fall increase
- 4 jumper geyser
- 5 freezing boiling
- 6 bored fascinated
- 7 exhibition eruption
- 8 accident earthquake
- 9 small giant
- 10 mistake movement
